

Title Index

- $\sigma(T)$, $\|T\|$, and $\|T^{-1}\|$
(Daniel, Palmer), 381
- Algebren, submultiplikative Normen
(Hädeler), 173
- Complex programming, complex transposition theorem with applications
(Mond, Hanson), 49
- Complex transposition theorem
(Mond, Hanson), 401
- Condition numbers, II, norms and inequalities
(Marshall, Olkin), 167
- Continuants, periodic
(Rózsza), 267
- Determinants, bounds
(Bailey, Crabtree), 303
- Eigenwerte, Abschätzungen für die, positiver Linearer Operatoren
(Bauer, Deutsch, Stoer), 275
- Eigenwertprobleme, multiplikative inverse
(Hädeler), 65
- Gerschgorin sets III
(Levinger), 13
- Hermitian forms and tensor contraction
(Williamson), 335
- Inertia theory for simultaneously triangulable complex matrices
(Hill), 131
- Linear algebraic equations with interval coefficients
(Hansen), 153
- Matrices, a characterization
(Fiedler), 191
- Matrices, blocs- H -, et convergence des méthodes itératives classiques par blocs
(Robert), 223
- Matrices, bounds for perron eigenvectors and subdominant eigenvalues
(Lynn, Timlake), 143
- Matrices, copositive
(Haynsworth, Hoffman), 387
- Matrices, equimodular, the eigenvalue set
(Bradley), 105
- Matrices, inertia theory
(Hill), 131
- Matrices, the areal spread
(Smith, Mirsky), 127
- Matrices, theorems on products of EP ,
(Baskett, Katz), 87
- Matrix commutativity, a generalization
(Taussky), 349
- Matrix equation $H = AP + PA$
(Ballantine), 37
- Matrix, estimate of the spectral radius and spectral abscissa
(Lozinskiy), 117
- Matrix inequalities, inverse extensions
(Mond), 393
- Matrix, minimizing a norm
(Moors), 447
- Matrix, spectrum of nonlinear operator
(Menon, Schneider), 321
- Matrix, theorem for pivotal transforms
(Iri), 427
- Partial differential equations
(Heading), 413
- Perturbation with two parameters
(Turner), 1
- Polyhedra, related to combinatorial problems
(Gomory), 451
- Relaxation, chaotic
(Chazan, Miranker), 199

- Submatrices, equality in linear inequalities (Thompson), 375
- Submatrices, independence of the eigenvalues (Thompson), 355
- Tensor contraction and Hermitian forms (Williamson), 335
- Transformations, elementary divisors (Marcus, Pierce), 21
- van der Waerden conjecture, II, remarks (Eberlein), 311
